The Northern Sierra Air Quality Management District, with funding provided by the U.S. EPA, is providing you with this resource for firewood storage to keep your wood seasoned and dry.

According to the U.S. EPA BurnWise program, wood moisture content should be less than 20%. Greater moisture content leads to less heat, excessive smoke, and additional creosote buildup in your chimney pipe. Your new woodshed holds one cord of firewood and can help you store your firewood so that it can season and dry properly.
