

**REGULATION II
PROHIBITIONS**

Rule 220 **New or Modified Bulk Petroleum Facilities**

1. Any new or major modified bulk loading facility as of December 15, 1988 shall install bottom loading equipment at the time of installation or modification.

2. Federal Ozone Non-attainment Areas

The following provisions shall apply only in those portions of the District designated as non-attainment of any federal ambient air quality standard for ozone and are in addition to and supersede all other provisions of this rule:

A. Any existing, new or major modified bulk loading facility shall install and maintain bottom loading equipment no later than January 1, 2009.
